

# Domino Migrator

## High Data Completeness & Thoroughness

TrustSafe® Domino Migrator takes care of Consistency, Logic, Metadata and Data Mapping apart from Data Format for applications migration projects.

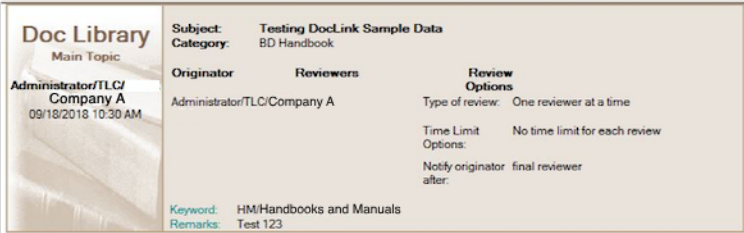

The data migration is processed in 5 key steps: (1) Data Consolidation, (2) Export Data, (3) Data Manipulate, (4) Data Conversion & (5) Import Data.

## Unique Features

1. Support convert Notes mail to EML format with or without attachment in the email
2. Support Notes native sign & encrypt email, SMIME mail
3. Support convert Notes application document content to HTML, PDF, Word or XML format and detail document properties including customized field values in the application document
4. Convert Notes application document content must support doc link, DB link, table, section, attachment and field values
5. Support convert the doc link, DB link and attachment to the new link in new application platform
6. Allow flexible data mapping of existing Notes application and new application platform by self-defined mapping
7. With flexibility to exclude certain attachment type, specified document with certain property when migrate data to new platform.
8. Able to import data to SharePoint / IBM Connections / SQL DB
9. Provide detail data analysis and migration report

Serving organisations from different sectors and regions, TrustSafe offer messaging and collaboration enhancement solutions that go beyond corporate communication enablement.

We help clients address their security and compliance concerns without sacrificing work efficiency.

A veteran security solution provider, we started off by developing PKI-based confidential mail system seamlessly integrated with Domino. The system has then been adopted by a wide spectrum of companies that put data security and confidentiality at the forefront.
